Bidvest Facilities Management was originally formed in 2000 under the name, Total Facilities Management Company (TFMC). The company joined the Bidvest Group in 2013 and changed its name in 2015 when it became a strategic asset as one of Bidvest’s core service divisions.

With over 15 years’ experience in the Facilities Management the company has carved a niche as an industry leader in South Africa. It is because of this legacy and track-record for excellence that Bidvest Facilities Management has the honour of being seen as a driver of growth of the Services Division in the Bidvest Group.

As an organisation, we firmly believe that we are able to add significant value to our clients businesses at a strategic enterprise level.

**B-BBEE STATUS**

Bidvest Facilities Management, backed by the financial strength of the Bidvest Group, a black-owned organisation listed on the JSE, is a Level 1 B-BBEE, Empowered Supplier.

**VISION**

To create a sustainable business by delivering consistently great customer experiences.

**MISSION**

1. Be renowned as a provider of consistent service excellence driven by innovation
2. Grow our Technical Services revenue stream by actively marketing our technical skills, competence and capability
3. Create a culture of consistent service delivery, health and safety adherence and innovative thinking resulting in fully accountable, collaborative, motivated and commercially driven employees
4. Drive long-term sustainability by continuous engagement with our key stakeholders whilst delivering consistent results to both our shareholders and customers
5. Ensure consistently exceptional client experiences and create sustainable mutually beneficial relationships – balancing value with cost
6. Actively manage cost by focusing on optimisation, reduction and containment

**CORE VALUES**

Customer-centricity

Teamwork

Innovation

Transparency

R.I.T.C.H

Respect, Integrity, Trust, Commitment, Honesty

**BUNDLED SOFT SERVICES**

As a market leader in the provision of facilities management services, Bidvest Facilities Management can provide clients with customised, flexible and competitive facilities services. Following global trends towards self-delivery and cost efficiency, more and more clients are benefiting from multiple services provided through a single service provider.

Accounts are managed by a key accounts manager providing a single point of contact. Clients will enjoy improved service delivery, increased risk mitigation, reduction of vendor base, and the utilisation of best practices gleaned over 25 years of the history of the Bidvest Group.

These services include:

**Cleaning, high level cleaning, upholstery and carpet cleaning**

**Hygiene, deep cleaning, pest control**

**Physical and technical security**

**Catering, vending, tea, coffee and water services**

**Waste management**

**Laundry and garment hire services**

**Landscaping services and internal plants**
Bidvest Facilities Management has a comprehensive range of generators of varying sizes to suit different requirements.

We also offer an end-to-end generator service with a highly-skilled, national team of technicians who are available around the country for refuelling, maintenance and emergency back-up support.

This proactive and innovative service is available on short or long-term contracts depending on your requirements. We will assess your needs carefully before recommending and installing suitable generator solutions.

If you would like your own staff to manage your generators we also provide certified, comprehensive training to equip them with the required knowledge and skills.

We offer full backup support on:

<table>
<thead>
<tr>
<th>Servicing</th>
<th>Deployment</th>
<th>Maintenance</th>
<th>Refuelling</th>
</tr>
</thead>
</table>

MOBILE MAINTENANCE

Bidvest Facilities Management offers basic electrical, plumbing, mechanical and general building support on a scheduled weekly, fortnightly or monthly contract.

Services typically include:

</tr>
<tr>
<td>Measurement and verification of energy and water savings</td>
<td>Managing, monitoring, tracking and reporting</td>
</tr>
<tr>
<td>Sustainable energy solutions and awareness campaigns</td>
<td>Remote metering</td>
</tr>
</tbody>
</table>
Bidvest Facilities Management’s Contact Centre consists of two divisions, namely the Call Centre/Help Desk and the Building Control Centre. There are approximately 90 staff on shift on a rotation basis 24 hours a day, 365 days a year.

**Bidvest Facilities Management**

Bidvest Facilities Management has a Help Desk operation with a dedicated share call number and a service that is available 24 hours a day, 7 days a week. Through software integration, the Help Desk has been customised to perform the following functions:

- Consolidate all operations requests to one single point of contact
- Field all calls from tenants (if applicable)
- Capture all FM work requests in the system, measured against agreed service level specifications and standards
- Assign all operations requests to the work management system
- Make available all status and history of operations requests.

The Help Desk provides a single point of entry for all facilities management service requests raised by our clients’ staff. It also serves as a single source of information for providing feedback on all logged service requests and the progress made towards executing these requests. In case of an after-hours emergency, the Help Desk will direct callers to emergency service telephone numbers.

**45,000 Contacts per month of which 16,000 are Calls logged via voice**

Calls are logged via voice, e-mail and portal

Integrated into SAP platform

Operational SLA’s to measure the number of calls answered within a specific timeframe (In Seconds): 90/30, 90/10

SLA for e-mails = Reference number issued within 30 minutes of the time of receipt of the original mail

Departmental abandonment rate benchmarked at <2% of the total calls received, however Bidvest Facilities Management achieves

AHT (Average Handling Time) = 3.5 – 5 minutes

Call answering Speed in 5 seconds

Auto answering for all calls received
Bidvest Facilities Management’s Building Management Control Centre offers remote surveillance to proactively manage all events and/or alarms from critical sites. It also offers remote meter information gathering which effects utility account management through financial and technical account analysis.

The centre prides itself in its quick response to system or equipment failures. By monitoring equipment alarms remotely on sites that have been identified as crucial by our clients, the centre can quickly dispatch the correct technician to the site and minimise downtime.

Early warning alarms help to identify problems to equipment condition. Maintenance experts located at Bidvest Facilities Management’s Head Office and Regional Offices can analyse the system condition remotely, notify local technicians in advance that a system is not performing to design specifications and assist them where needed.

Forecasting is possible by identifying trends. We can perform Emergency Reaction and Control and we archive historical plant data which is used to deliver reports according to customer requirements (Service Level Agreements). We partner with other divisions in Research and Design projects and hold control during the Disaster Recovery process. (Disasters could include major storms, major power outages, etc.)

This option includes the remote operation of a site or site control room, which includes lifts monitoring, evacuation control and fire systems.

A strong presence is required in every building, which can be achieved in various ways depending on the chosen Building Management Solution (BMS) and the design. Further involvement is required during the design phase to ensure interfacing.
